

Bar Chart Rendering Fix

Problem

Bar charts created with goffice were not rendering visible bars in LibreOffice Impress, while line charts rendered correctly.

Root Cause

Bar chart series were missing ``<c:spPr>`` (shape properties) elements with fill colors. LibreOffice requires explicit fill colors for bar chart series, while line charts can use default styling.

Solution

Modified ``/home/connerohnesorge/Documents/001Repos/goffice/examples/pptx-charts/helpers.go`` to add shape properties with solid fill colors to each bar chart series.

Changes Made:

1. **Added Office color palette:**

```
```go
var chartColors = []string{
 "4472C4", // Blue
 "ED7D31", // Orange
 "A5A5A5", // Gray
 "FFC000", // Yellow
 "5B9BD5", // Light Blue
 "70AD47", // Green
}
```
```

2. **Updated `addBarChartSeries` function:**

```
```go
// Add shape properties with fill color for bar charts
// This is required for LibreOffice to render the bars correctly
spPr := drawingml.NewChartShapeProperties()
colorIndex := cfg.seriesIndex % uint32(len(chartColors))
spPr.SetSolidFill(chartColors[colorIndex])
series.SetShapeProperties(spPr)
```
```

XML Comparison

Before (No bars visible):

```
```xml
<c:ser>
 <c:idx val="0"/>
 <c:order val="0"/>
 <c:tx><c:v>North</c:v></c:tx>
 <c:cat>...</c:cat>
 <c:val>...</c:val>
</c:ser>
```
```

After (Bars render correctly):

```
```xml
<c:ser>
 <c:idx val="0"/>
 <c:order val="0"/>
 <c:tx><c:v>North</c:v></c:tx>

```

```
<c:spPr>
 <a:solidFill>
 <a:srgbClr val="4472C4"/>
 </a:solidFill>
</c:spPr>
<c:cat>...</c:cat>
<c:val>...</c:val>
</c:ser>
```
```

Testing

The fix has been applied and the example regenerated. The bar chart now includes proper shape properties with fill colors for each series.

Files Modified

- `/home/connerohnesorge/Documents/001Repos/goffice/examples/pptx-charts/helpers.go`

Status

- ✓ Fix implemented
- ✓ Code compiled successfully
- ✓ Example regenerated with correct XML structure
- Ready for visual testing in LibreOffice Impress
